REASONS FOR ALLOWANCE

Claims 1 – 8 and 10 - 15 are allowable. The following is an examiner's statement of reasons for allowance:

With regards to claim 1, the examiner cannot find any applicable prior art and/or suggestion disclosing a statistical face shape model computing step, to use a principal component analysis (PCA) process to compute a plurality of principal components based on the aligned shape vectors to create a statistical face shape model, wherein the statistical face shape model represents the shape vectors by combining a plurality of projection coefficients, and the statistical face shape model computing step includes: computing a mean value of the feature points of the aligned shape vectors to define a mean shape vector x as $x = (1/N) \sum_{a=1}^N x_a$, where x_a is an aligned shape vector, subtracting each aligned shape vector x_a by the mean shape vector x to form matrix $A = [d_{x1}, d_{x2}, \dots, d_{xN}]$ and $d_{x_a} = x_a - x$, computing a covariance matrix C of the matrix A , and computing a plurality of principal components according to eigenvectors v_k^s , which are derived from $Cv_k^s = \lambda_k^s v_k^s$ with eigenvalues λ_k^s corresponding to the covariance matrix C formed as $C = AA^T$ for $1 < k < m$ where m is the dimension of the covariance matrix C for $\lambda_1^s > \lambda_2^s > \dots > \lambda_m^s$, to thereby form the statistical face shape model in combination with the rest of the limitations of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
